Kromek Group plc
("Kromek" or the "Group")

Kromek Chief Executive Officer Appointed as Deputy Lieutenant of County Durham

Kromek (AIM: KMK), a worldwide supplier of detection technology focusing on the medical, security screening and nuclear markets, is pleased to note that its Chief Executive Officer, Dr Arnab Basu MBE, has been appointed as a Deputy Lieutenant of County Durham by Her Majesty's Lord-Lieutenant of County Durham, Mrs Sue Snowden.

In this role, Dr Basu will support the Lord-Lieutenant in her duties that include promoting a good atmosphere and spirit of co-operation by the encouragement she gives to voluntary service and to benevolent organisations and by the interest she takes in the business, industrial and social life of County Durham.

Dr Basu was selected for appointment following many years of dedicated service to his local community within the voluntary sector as well as business sector. In addition to being the CEO of Sedgfield headquartered Kromek, he has been a prominent member of the local community supporting mental health charities, sports organisations, the Health Service as the Chair of the Academic Health Science Network and supporting British businesses as a Council member of Innovate UK.

Speaking about his appointment, Dr Arnab Basu said: "I am deeply honoured and humbled to be appointed to this prestigious role. County Durham has been home to me for over two decades and it is where we have grown as a family. My time in Durham University, professional career with Kromek and wide ranging involvement in the local community has provided me with experience that I can draw on to support the Lord-Lieutenant's work and help to make a positive difference."

About Kromek Group plc

Kromek Group plc is a technology group (global HQ in County Durham) and a leading developer of high performance radiation detection products based on cadmium zinc telluride ("CZT") and other advanced technologies. Using its core technology platforms, Kromek designs, develops and produces x-ray and gamma ray imaging and radiation detection products for the medical, security screening and nuclear markets.

The Group's products provide high resolution information on material composition and structure and are used in multiple applications, ranging from the identification of cancerous tissues to hazardous materials, such as explosives, and the analysis of radioactive materials.

The Group's business model provides a vertically integrated technology offering to customers, from radiation detector materials to finished products or detectors, including software, electronics and application specific integrated circuits ("ASICs").

The Group has operations in the UK and US (California and Pennsylvania), and is selling internationally through a combination of distributors and direct OEM sales.

Currently, the Group has over one hundred full-time employees across its global operations. Further information on Kromek Group is available at www.kromek.com and <https://twitter.com/kromekgroup>.
